#### **Electrifying Momentum**

#### **KEY INVESTMENT HIGHLIGHTS**

- 1QFY24 result outperformed expectations
- Power Seraya key driver of group's +389%yoy 1QFY24 earnings growth
- FY24F/25F net profit raised +50%/+53%
- Re-affirm BUY at higher TP of RM2.99

**Still outperforming.** YTL Power (YTLP) reported a net profit of RM847.9m for its 1QFY24, which was well ahead of estimates, accounting for 41.7%/39.3% of our/consensus full year projection respectively. The outperformance was attributable to stronger than expected margins at Seraya.

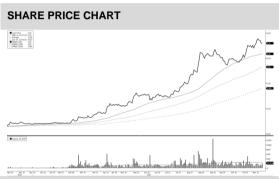

**Key takeaways.** Group 1QFY24 PBT was up +358.6%yoy driven mainly by Seraya which registered a +253.6%yoy PBT growth. Seraya is benefiting from a recovery in rates, cheap long term gas contracts and a stronger SGD. Notwithstanding some sequential softening in USEP following enforcement of the dynamic price cap since July 2023 by EMA, Seraya's margins continued to strengthen as it renews long-term retail contracts in a tight supply market with no capacity addition expected until 2026. Seraya takes a conservative strategy with ~70% of volumes locked into long-term contracts, shielding it from spot market volatility. Positively, USEP rates had since September 2023 recovered to >SGD200/MWh levels (See Chart 1), providing a good indicator to contract renewal momentum further out. Meanwhile, Wessex Water remained marginally in the red given non-cash impact of higher interest accruals on index-linked bonds of RM156m. However, the impact was expected to gradually reduce in tandem with easing UK inflation.

**Earnings revision.** Given stronger than expected results, we raise FY24F/25F net profit by +50.3%/+53.4% to factor in higher margins at Seraya. We now expect a +59%yoy FY24F earnings growth to be driven predominantly by Seraya from favourable retail contract renewals.

**Recommendation.** We re-affirm our **BUY** call on YTLP at higher SOP-derived **TP of RM2.99** (from RM2.45 previously) following the earnings upgrades in this report. We also factor in the valuation of YTLP's recently acquired 18.9% equity interest in Ranhill Utilities. We continue to like YTLP for: (1) Exposure to recovery in the Singapore electricity market, (2) Strategic expansion into data centre and RE. We also believe YTLP is a potential beneficiary from the strong RE growth trajectory under NETR, particularly for RE exports. Valuation is undemanding at just 6.5x FY24F PER while dividend yield of 7.7% (DPR: 50%) is attractive.
