PERFORMANCE OF THE FUND

MIDF Amanah Shariah Money Market Fund ("MASMMF"/or "the Fund")	15/04/2023	15/10/2022	%
Net Asset Value ("NAV") (RM)	34,215,192	114,623,243	-70.15
NAV per Unit (RM)	1.0012	1.0012	-

Note: The units of the Fund have been consolidated with the NAV per unit of RM1.0000 effective 16 December 2019 pursuant to the resolution approved via the unit holders' meeting held on 22 November 2019.

During the interim period as at 15 April 2023, the NAV was maintained at RM1.0000 per unit. The difference of RM0.0012 in the NAV per unit was the distribution payable for the period from 1 April to 15 April 2023, which will be declared in the next financial period of the Fund. The number of units in circulation of the Fund was at 34.2 million and the Fund distributed RM1.55 sen net income per unit, which translated to a net dividend yield of 3.11% per annum. The Fund met its objective in providing capital stability with regular income returns through investment in short-term Islamic placements and Islamic term deposits.

The total NAV contracted significantly over the interim period due to the significant redemption of the fund by one of the major investors.

The Maybank Islamic Overnight Rate has been identified as the benchmark given that it is easily accessible and provides a good indicator on the performance of the Islamic Money Market.

FIXED INCOME/SUKUK MARKET REVIEW

Local government sukuk/bond rallied in 4Q 2022 and ended the year on solid footing as United States (“US”) aggressive rates hike fears eased. This was further supported by expectations of improved stability on domestic politics following the conclusion of Malaysian 15th General Election (“GE15”) and the appointment of 10th Prime Minister. Following the current banking crisis in the US, demand for US Treasury (“UST”) improved and remained strong particularly on the short to medium tenures as investors moved to safety government sukuk/bonds globally. The Government Investment Issues (“GII”)/Malaysian Government Securities (“MGS”) yields curve was bull-steepened in 1Q 2023. Overall benchmark yields moved between 39 to 68 basis points (“bps”) lower across all tenures during the period under review.

The 20-year benchmark GII and 5-year benchmark MGS saw stronger movement with the yields declined by 68bps and 64bps, respectively. Whilst the 7-year benchmark GII yield ended lower by 55bps. As of end March 2023, the 3-, 5-, 7-, 10-, 15- and 20-year MGS benchmark closed at 3.38%, 3.51%, 3.74%, 3.91%, 4.15% and 4.20%, respectively. Meanwhile, GII benchmark closed at 3.31%, 3.60%, 3.85%, 3.96%, 4.16% and 4.21%, respectively.

Meanwhile, foreign holdings recorded the largest monthly inflows in March 2023 due to higher demand on safe-haven asset class following the US banking crisis. Inflows accelerated to +RM6.6bil in March (February: +RM4.3bil) and is the largest inflow since August 2021.

INVESTMENT OUTLOOK AND STRATEGY

Malaysia’s GDP growth moderated to 7.0% year-on-year in 4Q2022 (3Q2022: 14.2%). This brought full year 2022 GDP growth to 8.7%, marking the highest expansion since 2000. Key growth drivers in 4Q 2022 were mainly from robust private consumption, a steady rise in investments and higher net exports amid slower import demand. For 2023, we expect Malaysia’s economic growth to be slower at 4.2%. Continued expansion in domestic demand will be crucial to support growth this year while we factor in weaker growth in external trade on the back of slowing global economic growth.

On the monetary front, the Fed continued to raise the fund fed rate (“FFR”) by another 25bps during its Federal Open Market Committee (“FOMC”) monetary meeting in March 2023 to 4.75%-5.00% and signaled at least one more rate hike for this year. However, the current US banking turmoil and the failure of Silicon Valley Bank may force the Fed to adopt a more cautious strategy despite high inflation.

Meanwhile, on the local front, Bank Negara Malaysia (“BNM”) maintained the Overnight Policy Rate (“OPR”) at 2.75% in its second Monetary Policy Committee (“MPC”) meeting, in line with market consensus expectations. We view that BNM is taking a wait-and-see approach to assess the impact of the previous cumulative OPR hikes. However, we believe the possibility for further normalization remains and we expect BNM to continue raising the OPR by another 25bps to 3.00% in 2023.

Going forward, we foresee the prospect for sukuk/bond market to improve and likely to gain a firmer footing as higher inflation and aggressive interest rate hike are expected to reverse particularly in the 2H2023. Nonetheless, we take cognizance of macro headwinds, an extension of ongoing credit risks and cash flow strains will remain themes to monitor.

The Fund will continue investing in quality short-term Islamic money market instruments.

(d) Financial assets

Financial assets are recognised in the statement of financial position when, and only when, the Fund become a party to the contractual provisions of the financial instrument.

When financial assets are recognised initially, they are measured at fair value, plus, in the case of financial assets not at fair value through profit or loss ("FVTPL"), directly attributable transaction costs.

The Fund determines the classification of its financial assets at initial recognition.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D.)

(d) Financial assets (Cont'd.)

(i) Financial assets at FVTPL

A financial asset is measured at fair value through profit or loss if:

- Its contractual terms do not give rise to cash flows on specified dates that are solely payments of principal and profit (“SPPP”) on the principal amount outstanding; or
- It is not held within a business model whose objective is either to collect contractual cash flows or to both collect contractual cash flows and sell; or
- At initial recognition, it is irrevocably designated as measured at FVTPL when doing so eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring asset or liabilities or recognising the gains and losses on them on different bases.

Subsequent to initial recognition, financial assets at FVTPL are measured at fair value. Changes in the fair value of those financial instruments are recorded in ‘Net gain or loss on financial assets at fair value through profit or loss’. Profit earned and dividend revenue elements of such instruments are recorded separately in ‘Profit income’ and ‘Dividend income’, respectively. Exchange differences on financial assets at FVTPL are not recognised separately in profit or loss but are included in net gains or net losses on changes in fair value of financial assets at FVTPL.

(ii) Financial assets at amortised cost

Financial assets at amortised cost are those financial assets held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and its contractual terms give rise on specified dates to cash flows that are SPPP on the principal amount outstanding. The Fund includes short term receivables and Islamic deposits with financial institutions in this classification.

Subsequent to initial recognition, Islamic financial assets are measured at amortised cost using the effective profit rate method. Gains and losses are recognised in profit or loss when the financial assets are derecognised or impaired, and through the amortisation process.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D.)

(e) Impairment of financial assets

The Fund holds financial assets with no financing component and which have maturities of less than 12 months at amortised cost and, as such, has chosen to apply an approach similar to the simplified approach for Expected Credit Losses (“ECL”) under MFRS 9 to all its financial assets. Therefore, the Fund does not track changes in credit risk, but instead, recognises a loss allowance based on lifetime ECLs at each reporting date.

The Fund’s approach to ECLs reflects a probability-weighted outcome, the time value of money and reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

(f) Classification of realised and unrealised gains and losses

Unrealised gains and losses comprise changes in the fair value of financial instruments for the period and from reversal of prior period’s unrealised gains and losses for financial instruments which were realised (i.e. sold, redeemed or matured) during the reporting period.

Realised gains and losses on disposals of financial instruments classified as part of FVTPL are calculated using weighted average method. They represent the difference between an instrument’s initial carrying amount and disposal proceeds.

(g) Financial liabilities

Financial liabilities are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability.

Financial liabilities, within the scope of MFRS 9, are recognised in the statement of financial position when, and only when, the Fund become a party to the contractual provisions of the financial instrument. Financial liabilities are classified as other financial liabilities.

The Fund’s financial liabilities which include other payables and sundry creditors are recognised initially at fair value plus directly attributable transaction costs and subsequently measured at amortised cost using the effective profit rate method.

A financial liability is derecognised when the obligation under the liability is extinguished. Gains and losses are recognised in profit or loss when the liabilities are derecognised, and through the amortisation process.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D.)

(h) Unit holders' capital

The unit holders' contributions to the Fund meet the definition of puttable instruments classified as Shariah-compliant equity instruments under the revised MFRS 132 *Financial Instruments: Presentation*.

Distribution equalisation represents the average distributable amount included in the creation and cancellation prices of units. This amount is either refunded to unit holders by way of distribution and/or adjusted accordingly when units are cancelled.

(i) Dividend distribution

Dividend distributions are at the discretion of the Fund. A dividend distribution to the Fund's unit holders is accounted for as a deduction from realised reserves except where dividend is sourced out of distribution equalisation which is accounted for as a deduction from unit holders' capital. A proposed dividend is recognised as a liability in the period in which it is approved.

(j) Cash and cash equivalents

For the purpose of the statement of cash flows, cash and cash equivalents consist of bank balances and Islamic deposits and Islamic placements with banks and other Islamic financial institutions with original maturity of three months or less, subject to insignificant risk of changes in value.

(k) Income

Income is recognised to the extent that it is probable that the economic benefits will flow to the Fund and the income can be reliably measured. Income is measured at the fair value of consideration received or receivable.

Profit income from the Islamic deposits with financial institutions recognised using the effective profit methods.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D.)

(l) Income tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date.

Current taxes are recognised in profit or loss except to the extent that the tax relates to items recognised outside profit or loss, either in other comprehensive income or directly in equity.

No deferred tax is recognised as there are no material temporary differences.

(m) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting used by the chief operating decision-maker. The operating results are regularly reviewed by the Investment Manager and the Oversight Committee. The Fund Manager assumes the role of chief operating decision maker, for performance assessment purposes and to make decisions about resources allocated to the segment.

(n) Significant accounting estimates and judgments

The preparation of the Fund's financial statements requires the Manager to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability in the future.

No major judgments have been made by the Manager in applying the Fund's accounting policies. There are no key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within next period.

3. MANAGER'S FEE

The Manager's fee is computed on a daily basis at 0.1% (15.04.2022: 0.1%) per annum of the NAV of the Fund before deducting the Manager's and Trustee's fees for that particular day.

4. TRUSTEE'S FEE

The Trustee's fee is computed on a daily basis at 0.02% (15.04.2022: 0.02%) per annum of the NAV of the Fund before deducting the Manager's and Trustee's fees for that particular day.

14. FINANCIAL INSTRUMENTS

(a) Classification of financial instruments

The Fund’s financial assets and financial liabilities are measured on an ongoing basis at at amortised cost based on their respective classification. The significant accounting policies in Note 2 describe how the classes of financial instruments are measured, and how income and expenses are recognised:

- (a) all of the Fund’s financial assets, comprising Islamic deposits with financial institutions, cash at bank and profit receivable, are classified as financial assets which are measured at amortised cost; and
- (b) all of the Fund’s financial liabilities, comprising sundry creditor, amount due to Manager and amount due to Trustee, are classified as other financial liabilities which are measured at amortised cost.

Total profit income recognised on the Fund’s financial assets is disclosed in the statement of comprehensive income. The Fund does not have any financial assets or financial liabilities which are carried at fair value.

14. FINANCIAL INSTRUMENTS (CONT'D.)

(b) Financial instruments that are not carried at fair value and whose carrying amounts are reasonable approximation of fair value

The carrying amounts of the other financial assets and financial liabilities approximate the fair value due to their relatively short term maturity.

15. FINANCIAL RISK AND MANAGEMENT OBJECTIVES AND POLICIES

(a) Introduction

The Fund is exposed to a variety of risks including profit rate risk, credit risk, and liquidity risk. Whilst these are the most important types of financial risks inherent in each type of financial instruments, the Manager and the Trustee would like to highlight that this list does not purport to constitute an exhaustive list of all the risks inherent in an investment in the Fund.

The Fund's objective in managing risk is the creation and protection of unit holders' value. Risk is inherent in the Fund's activities, but it is managed through a process of ongoing identification, measurement and monitoring of risks. Financial risk management is also carried out through sound internal control systems and adherence to the investment restrictions as stipulated in the Trust Deed, the Securities Commission's Guidelines on Unit Trust Funds and the Capital Markets and Services Act 2007.

(b) Risk management structure

The Fund's Manager is responsible for identifying and managing risks. The Board of Directors of the Manager is ultimately responsible for the overall risk management approach within the Fund.

(c) Risk measurement and reporting system

Monitoring and controlling risks is primarily set up to be performed based on limits established by the Manager (and Investment Manager, if applicable) and Trustee. These limits reflect the investment strategy and market environment of the Fund as well as the level of the risk that Fund is willing to accept. In addition, the Fund monitors and measures the overall risk bearing capacity in relation to the aggregate risk exposure across all risks type and activities.

(d) Risk mitigation

The Fund has Islamic investment guidelines that set out its overall business strategies, its tolerance for risk and its general risk management philosophy. The Manager also has a Compliance Department to ensure that the Fund complies with the various regulations and guidelines as stipulated in its Trust Deed, the Securities Commission's Guidelines on Unit Trust Funds and the Capital Markets and Services Act 2007.

It is, and has been throughout the current and previous financial year, the Fund's policy that no derivatives shall be undertaken for either investment risk management purposes or for trading.

15. FINANCIAL RISK AND MANAGEMENT OBJECTIVES AND POLICIES (CONT'D.)

(e) Profit rate risk

Profit rate risk is uncertainties resulting from fluctuations in the prevailing level of market profit rates on its Islamic investments and financial position.

As at reporting date, the Fund has no floating rate financial instruments and thus does not have significant exposure to profit rate risk.

(f) Credit risk

Credit concentration

Credit concentration risk is associated with the number of underlying Islamic investments or Islamic financial institutions which a Fund invests in or place deposits with. As the Fund is allowed to place Islamic deposits and/or invest in Islamic money market instruments wholly with a single financial institution, the NAV per unit of the Fund would be affected if the financial institution is not able to make timely payments of profit and/or principal.

Credit default

This refers to the creditworthiness of the respective Islamic financial institutions which Islamic deposits are placed with and their ability to make timely payment of principal and profit. If the Islamic financial institutions become insolvent, the Fund may suffer capital losses with regards to the capital invested and profit foregone, causing the performance of the Fund to be adversely affected.

(g) Liquidity Risk

Liquidity risk is defined as the risk that the Fund will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Exposure to liquidity risk arises because of the possibility that the Fund could be required to pay its liabilities or redeem its units earlier than expected. The Fund is exposed to cash redemptions of its units on a regular basis. Units sold to unit holders by the Manager are redeemable at the unit holder's option based on the Fund's net asset value per unit at the time of redemption calculated in accordance with the Fund's Trust Deed.

It is the Fund's policy that the Manager monitors the Fund's liquidity position on a daily basis. The Fund also manages its obligation to redeem units when required to do so and its overall liquidity risk by requiring a 3-day notice period before redemptions.

The Manager's policy is to always maintain a prudent and sufficient level of liquid assets so as to meet normal operating requirements and expected redemption requests by unit holders. Liquid assets comprise cash, Islamic deposits with financial institutions and other Shariah-compliant instruments which are capable of being converted into cash within 7 days.

15. FINANCIAL RISK AND MANAGEMENT OBJECTIVES AND POLICIES (CONT'D.)

16. CAPITAL MANAGEMENT

The capital of the Fund can vary depending on the demand for redemptions and subscriptions to the Fund. The Fund's approved fund size and units in issue at the end of the financial period is disclosed in Note 9(a).

The Fund's objectives for managing capital are:

- (a) To invest in Islamic investments meeting the description, risk exposure and expected return indicated in its prospectus;
- (b) To achieve consistent returns while safeguarding capital by using various Islamic investment strategies;
- (c) To maintain sufficient liquidity to meet the expenses of the Fund, and to meet redemption requests as they arise; and
- (d) To maintain sufficient fund size to make the operation of the Fund cost-efficient.

No changes were made to the capital management objectives, policies or processes during the current financial period.

17. SEGMENT INFORMATION

The Manager of the Fund is responsible for allocating resources available to the Fund in accordance with the overall Islamic investment strategies as set out in the Investment Guidelines of the Fund.

The Fund invests only in short term Islamic deposits and all of its investments are located in Malaysia, therefore disclosure by business and geographical segment is not presented.
