Resilient US PMI, Rising Price Pressures in Europe

A. MARKET SNAPSHOT

- US business activity strengthened further in Aug-26, with the flash S&P Global Composite PMI rising to 56.0 (Jul-26: 54.5), the strongest expansion since Apr-22. The improvement was driven mainly by a sharp pickup in services activity, which offset softer manufacturing growth. Hiring accelerated to its fastest pace since early CY25 and business confidence improved, while selling price pressures moderated despite still-elevated input costs.
- The US labour market remained resilient in Aug-26, with initial jobless claims falling by 6k to 206k, below market expectations and maintaining the recent trend of historically low layoffs. However, continuing claims rose to 1.80m, indicating that some displaced workers are taking longer to find new employment despite overall labour market conditions remaining firm.
- US industrial production expanded modestly in Jul-26, rising +0.2%mom (Jun-26: +0.3%), slightly below market expectations of +0.3%, while output increased +1.1%yoy. Manufacturing production, which accounts for the bulk of industrial output, rose +0.2%mom, supported by a +0.4% increase excluding motor vehicles and parts, while mining and utilities output also recorded gains. Meanwhile, capacity utilisation edged higher to 76.3%, although it remained 3.1ppts below its long-run average, pointing to continued spare capacity across the industrial sector.
- 6 out of the 20 major indices we monitored closed higher last week, with the top three gainers being Hong Kong's Hang Seng (+3.6%), Vietnam's Ho Chi Minh VSE (+2.3%), and Indonesia's JCI (+1.9%). Meanwhile, the top three laggards were Japan's Nikkei 225 (-3.9%), the Nasdaq (-2.1%), and France's CAC 40 (-1.8%).

Source: Bloomberg

- Eurozone inflation accelerated in Jul-26, with headline CPI rising to +2.9%yoy (Jun-26: +2.8%), in line with preliminary estimates and remaining above the ECB's 2% target. The increase was largely driven by a renewed surge in energy inflation to +10.3%yoy (Jun-26: +8.5%) amid renewed US-Iran hostilities, while services and non-energy industrial goods inflation also strengthened. Meanwhile, core inflation edged higher to +2.5%yoy (Jun-26: +2.4%), indicating persistent underlying price pressures despite softer food inflation. On a monthly basis, consumer prices rose +0.2%mom, reversing June's -0.1% decline.
- UK inflation accelerated in Jul-26, with headline CPI rising to +2.9%yoy (Jun-26: +2.6%), the highest in four months and in line with expectations. The increase was driven mainly by higher housing and utility costs following the rise in Ofgem's energy price cap, while transport and food inflation moderated. Meanwhile, core inflation remained unchanged at +2.6%yoy, suggesting underlying price pressures remained relatively persistent.
- The UK labour market remained broadly stable in the three months to Jun-26, with the unemployment rate holding at 4.9%, above expectations for a decline to 4.8%. Employment increased by 84k, although the pace of job creation slowed from the previous period as firms remained cautious about hiring amid ongoing domestic and global uncertainty.
- Japan's economic growth moderated in 2Q26, with GDP expanding +0.3%qoq, below market expectations and slowing from 1Q26. Domestic demand remained weak as private consumption stalled and capital expenditure declined further, while net trade provided the main support to growth. On an annualised basis, GDP grew +1.1%, with analysts warning that persistent cost pressures could weigh further on household spending and business investment in 3Q26.
- China's industrial activity softened in Jul-26, with industrial production growth slowing to +4.5%yoy (Jun-26: +5.3%), below expectations. The moderation reflected weaker manufacturing and utilities output alongside a deeper contraction in mining, although technology-related sectors such as computers, communications equipment and transport machinery remained

relatively resilient.

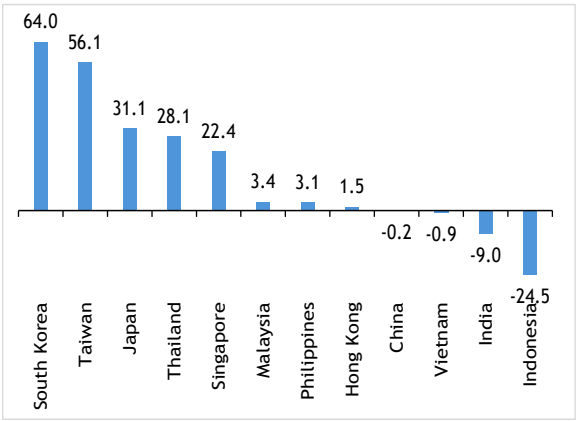

- China's retail sales growth weakened further in Jul-26, rising just +0.6%yoy (Jun-26: +1.0%), well below market expectations. Big-ticket consumption remained a key drag, with sharp declines in automobile, furniture and building material sales, while stronger spending on communication equipment, cosmetics and food provided only partial support.
- China's labour market softened in Jul-26, with the surveyed urban unemployment rate rising to 5.2% (Jun-26: 5.0%), slightly above market expectations. The increase was broad-based across locally registered and migrant workers, reinforcing signs of softer domestic momentum alongside weaker retail and industrial activity.
- Malaysia's inflation remained contained in Jul-26, with headline CPI easing to +1.8%yoy (Jun-26: +1.9%), the lowest since Mar-26 and within Bank Negara Malaysia's target range. The moderation was driven by slower transport, services and financial-related price increases, while food and housing inflation accelerated modestly. Core inflation also eased to +1.8%yoy, while consumer prices were unchanged on a monthly basis.
- Malaysia's external trade remained robust in Jul-26, with the trade surplus widening to MYR22.5b (Jul-25: MYR14.8b), exceeding market expectations of MYR17.5b, as export growth continued to outpace imports. Exports surged +38.0%yoy, driven by strong manufactured goods shipments, particularly E&E products, alongside robust demand from the US, China, Taiwan and the EU. Meanwhile, imports increased +36.4%yoy, primarily reflecting higher intermediate and capital goods purchases. In 7M26, the cumulative trade surplus more than doubled to MYR170.5b (7M25: MYR71.4b), as exports expanded +29.2%yoy compared with a +19.8%yoy increase in imports.
- The US dollar depreciated against the Ringgit last week by -1.2%, closing at RM4.0385. Meanwhile, Brent crude oil rose +6.6% to USD94.39 per barrel, while crude palm oil gained +6.5% to RM5,018.00 per tonne.

B. TRACKING MONEY FLOW - ASIA

- Across the eight Asian markets we monitor, foreign investors reverted to net selling after a week of net buying, with total net foreign outflows amounting to -USD1.11b. Net inflows were led by India, followed by Indonesia and Taiwan, while net outflows were led by South Korea, Malaysia, Thailand, Vietnam and the Philippines.
- India extended to a five-week consecutive streak of net foreign inflows, recording USD724.6m in inflows. This came amid India's unemployment rate easing to 5.1% in Jul-26 from 5.5% in the previous month, marking a four-month low, driven by lower rural unemployment and stronger employment conditions. Labour force participation also rose to 55.4% from 54.4%, pointing to improving labour market conditions.
- In Indonesia, foreign investors reverted to net buying after a week of net selling, recording USD126.0m in inflows. This came amid Bank Indonesia (BI) kept its key policy rate unchanged at 5.75% for the second consecutive meeting in Aug-26, following a cumulative 100bps of hikes since May to support the rupiah. Meanwhile, inflation eased to +2.9%yoy in Jul-26, remaining within BI's +1.5% to +3.5% target range.
- In Taiwan, foreign investors extended their net buying streak to three consecutive weeks, recording USD21.3m in net foreign inflows. This came as Taiwan's export orders surged +61.9%yoy to a record USD97.9b in Jul-26, accelerating from +59.4% in Jun-26, driven by robust global demand for AI-related and technology products, particularly information and communication products, electrical machinery and machinery.
- In South Korea, foreign investors reverted to net selling after the previous week's net buying, recording -USD1.60b in net

foreign outflows. This came despite South Korea's producer price inflation eased to +7.7%yoy in Jul-26 from +8.5% in Jun-26, despite remaining elevated amid higher manufacturing prices, particularly coal and petroleum products, computers and electronics, chemicals, and basic metals.

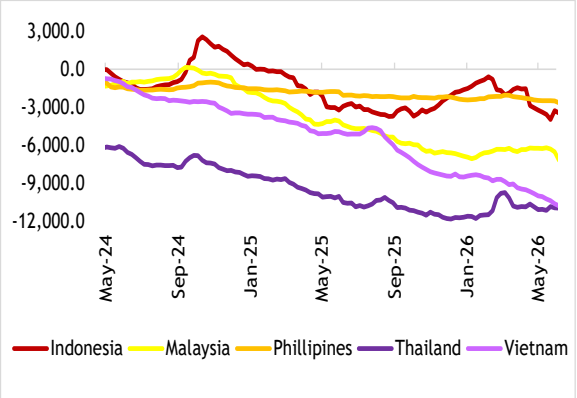

- In Thailand, foreign investors reverted to net selling after a week of net buying, recording -USD105.1m in net foreign outflows. This came as Thailand's GDP growth moderated to +1.9%yoy in 2Q26 from +2.8% in 1Q26 but remained above market expectations of +1.7%. The slowdown was mainly driven by softer private consumption and government spending, while exports and imports continued to expand strongly.
- In Vietnam, foreign investors extended their net selling streak to two consecutive weeks, recording -USD101.7m in net outflows. This came amid calls for Vietnam to move beyond low-cost manufacturing by developing industrial clusters, enhancing infrastructure connectivity and improving supply chain transparency, as the country seeks to capture greater value from regional and global supply chains.
- Foreign investors in the Philippines extended their net selling streak to three consecutive weeks, recording -USD33.1m in net foreign outflows. This came as the Philippines' cash remittances rose +1.7%yoy to USD3.04b in Jun-26, marking the slowest annual growth in over four years, although monthly inflows reached their highest level since Dec-25.

C. TRACKING MONEY FLOW - MALAYSIA

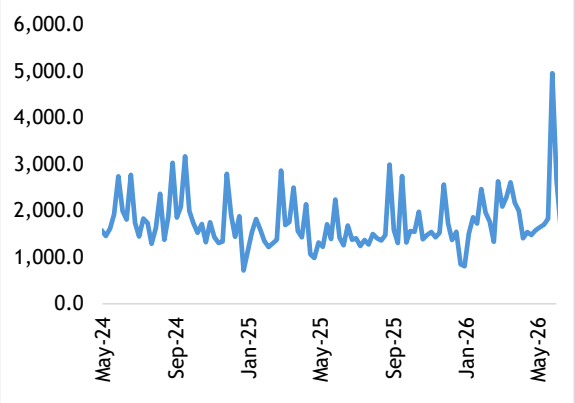

- On Bursa Malaysia, foreign institutions extended to a three-week consecutive streak of net selling, recording -RM549.1m in net outflows.
- Foreign institutions were net sellers on all five trading days during the week. The highest outflows were recorded on Monday (-RM190.5m), followed by Tuesday (-RM188.3m), Wednesday (-RM124.7m), Thursday (-RM34.9m) and Friday (-RM10.8m).
- The top three sectors that recorded net inflows from foreign institutions were Utilities (RM141.8m), Transportation & Logistics (RM56.6m), and Healthcare (RM31.8m). Meanwhile, the top three sectors that recorded net foreign outflows were Financial Services (-RM420.1m), Technology (-RM161.0m), and Consumer Products & Services (-RM101.6m).
- Local institutions extended to a four-week consecutive streak of net buying, recording RM591.1m in net inflows.
- Meanwhile, retailers reverted to net selling after a week of net buying, recording -RM42.0m in net outflows.
- The average daily trading volume (ADTV) saw a broad-based increase; retailers were up by +13.3%, local institutions by +13.2%, and foreign institutions by +3.2%.
